

## DELTA oversleeves (welded)

### FIELD OF APPLICATION

DELTA oversleeves are suitable for use in the food industry (high resistance to animal fats and blood).  
DELTA oversleeves are PPE offering a certain level of protection against mechanical risks.  
Temperature range for use: -20°C to +40°C.

**MATERIAL:** polyurethane

### FEATURES

- **Colour:** blue
- **Thickness:** 200 µm (± 10%)
- **Weight:** 250 g/m<sup>2</sup> (± 10%)
- **Dimensions** standard: length 45 cm

Blue

White

Totally assembled by waterproof welds.  
Integrated elastic wrist tightening.  
Highly resistant to snag thanks to its elongation of more than 500%.

### NORMS & REGULATIONS

- Base material in accordance with **EC N° 1935/2004 Regulation**, articles 3 and 4 on materials and articles intended to come into contact with food.
- Base material in accordance with **UE N°10/2011 Regulation** on rubber materials and articles intended to come into contact with food. This equipment may be put in fortuitous contact with all types of food except acidic food (PH inferior to 4,5).
- Apron in accordance with **Article 33 of the REACH Regulation N°1907/2006** and its amendments on products containing SVHC.
- Does not contain phthalate, silicone (and silicone derivatives), or bisphenols.

### CLEANING

**Cleaning:** wash and brush the apron in hot soapy water (40°C) or in a mixture of water and a gentle detergent.  
**Rinsing:** with water. Do not use toxic products to clean or rinse the apron. **Storage:** After cleaning, store in a dark, dry, well-ventilated place. The oversleeves must be replaced when they show signs of wear and tear.  
**With a proper use and a good maintenance, your oversleeves last longer!**
