CLEANING CONDITIONS

Cleaning / Disinfection: PPE can be cleaned using a suitable washing gun, by soaking, by vigorous brushing or in a washing machine. In all cases, the water with added product must be at a maximum temperature of 63 ° C.

Warning : the technical sheet of the product used refers to a maximum water temperature, which may be lower.

Particular attention to dosage and temperature must be observed in the case of using alkaline chlorinated or acidic products.

Use only products authorized by the veterinary services. The use of chlorine in large doses and at high temperature is not recommended.

Disinfection: High temperature disinfection can be done with clean water of a minimum of 82 ° C up to a maximum temperature of 90 ° C, in a machine, by soaking or sprinkling.

Drying and Storage: Forced drying by hot or natural air ventilation but in a dry and ventilated place. Store in a cool, dry place
