

## **CROSS STRAPS** Ref. OATP010.50.000.05

### FIELD OF APPLICATION

Removable and adjustable cross straps for metallic aprons.

### CLEANING CONDITIONS

The cross straps should undergo the same cleaning process as the metallic apron. You should rinse the cross straps with a minimum 80°C water temperature. You should disinfect the cross straps with a non-acid product authorized by the health services. Do not use any chlorine or chlorinated alkaline products at high concentration, and avoid prolonged contact with these products.
